NOTES TO THE FINANCIAL STATEMENTS**1. Summary of Significant Accounting Policies and Going Concern****A. Accounting Practices**

The accompanying financial statements of Metropolitan General Insurance Company (the “Company” or “MGEN”) have been prepared on the basis of accounting standards prescribed or permitted (“RI SAP”) by the State of Rhode Island (“RI”) Department of Business Regulation, Insurance Division (the “Department” or “RIDBR”).

The Department recognizes only the statutory accounting practices prescribed or permitted by Rhode Island in determining and reporting the financial condition and results of operations of an insurance company, in determining its solvency under the Rhode Island Insurance Law. In 2001, the National Association of Insurance Commissioners’ (“NAIC”) *Accounting Practices and Procedures Manual* (“NAIC SAP”) was adopted as the basis of RI SAP.

The Department has not adopted any prescribed accounting practices that differ from those found in NAIC SAP. A reconciliation of the Company’s net income and capital and surplus between RI SAP and NAIC SAP is as follows:

	SSAP Number.⁽¹⁾	Financial Statement Page	Financial Statement Line Number	For the Six Months Ended June 30, 2021	For the Year Ended December 31, 2020

⁽¹⁾ Statement of Statutory Accounting Principles (“SSAP”)

B. Use of Estimates in the Preparation of the Financial Statements

No significant change.

C. Accounting Policy

- (1) No significant change.
- (2) The Company did not sell and reacquire any NAIC Securities Valuation Office Identified Funds.
- (3) No significant change.
- (4) Redeemable preferred stocks are generally stated at amortized cost unless they have a NAIC rating designation of 3, 4, 5 or 6, in which case such stocks are stated at the lower of amortized cost or fair value. Perpetual preferred stocks are generally stated at fair value. Mandatory convertible preferred stocks are stated at fair value, not to exceed any currently effective call price, prior to conversion.
- (5) No significant change.
- (6) Mortgage-backed bonds, included in bonds, are generally stated at amortized cost using the scientific method unless they have a NAIC rating designation of 3, 4, 5, or 6, which are stated at the lower of amortized cost or fair value. Amortization of the discount or premium from the purchase of these securities considers the estimated timing and amount of prepayments of the underlying mortgage loans. Actual prepayment experience is periodically reviewed and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For credit-sensitive mortgage-backed and asset-backed bonds and certain prepayment-sensitive bonds (e.g., interest-only securities), the effective yield is recalculated on a prospective basis. For all other mortgage-backed and asset-backed bonds, the effective yield is recalculated on a retrospective basis.

For certain residential mortgage-backed securities (“RMBS”) and commercial mortgage-backed securities (“CMBS”), both an initial and final NAIC designation is determined on a security-by-security basis based on a range of values published by the NAIC. The initial designation is used to determine the carrying value of the RMBS or CMBS. RMBS and CMBS with initial designations of 1 or 2 are stated at amortized cost, while RMBS and CMBS with initial designations of 3, 4, 5 or 6 are stated at the lower of amortized cost or fair value. The final designation calculation compares this carrying value with a range of values, resulting in a final NAIC designation reported herein, which is used for all other accounting and reporting purposes.

Assets and Liabilities

The methods and significant assumptions used to estimate the fair value of all admitted financial instruments are presented below.

The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. In most cases, the exit price and the transaction (or entry) price will be the same at initial recognition.

When developing estimated fair values, the Company considers two broad valuation techniques: (i) the market approach and (ii) the income approach. The Company determines the most appropriate valuation technique to use, given what is being measured and the availability of sufficient inputs, giving priority to observable inputs.

The Company categorizes its financial assets and liabilities into a three-level hierarchy, based on the significant input with the lowest level in their valuation. The input levels are as follows. Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for common stock. The size of the bid/ask spread is used as an indicator of market activity for bonds. Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1, quoted prices in markets that are not active, or other significant inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities. Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets and liabilities. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

In general, investments classified within Level 3 use many of the same valuation techniques and inputs as described in the Level 2 discussions below. However, if key inputs are unobservable, or if the investments are less liquid and there is very limited trading activity, the investments are generally classified as Level 3. The use of independent non-binding broker quotations to value investments generally indicates there is a lack of liquidity or the general lack of transparency in the process to develop the valuation estimates generally causing these investments to be classified in Level 3.

Bonds, Cash and Cash Equivalents

When available, the estimated fair value for bonds, including loan-backed securities, and cash equivalents, are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1, are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Generally, these investments are classified in Level 2.

When observable inputs are not available, the market standard valuation methodologies rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgment or estimation, and cannot be supported by reference to market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Generally, these investments are classified in Level 3.

The use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's securities holdings.

The estimated fair value for cash approximates carrying value and is classified as Level 1 given the nature of cash.

Investment Income Due and Accrued

Due to the short-term nature of investment income due and accrued, the Company believes there is minimal risk of material changes in interest rates or the credit of the issuer such that estimated fair value approximates carrying value. These amounts are generally classified as Level 2.

NOTES TO THE FINANCIAL STATEMENTS

- D. At June 30, 2021, the Company had no investments where it was not practicable to estimate fair value.
- E. The Company did not have any investments that were measured using NAV as a practical expedient as of June 30, 2021.
